Our spine is one of the most important parts of our body that gives us structure and support. It plays a vital role, enabling us to perform simple tasks like standing up and sitting upright. Spinelly's inspiration comes from the structure of the human vertebrae. The idea is to create a chair that simulates the support of the spine.

REYA

MERRYFAIR REYA ERGONOMIC CHAIR

An array of 62 coil springs respond precisely and quickly to every shape, weight and movement. Independent springs conform more accurately to the body than conventional foam and mesh surfaces which simply stretch to an uniform tension like a hammock. The result is a more proportional pressure distribution for healthy circulation and comfort.
